

# HOW FRESH IS YOUR "JIFFY" PRODUCT?

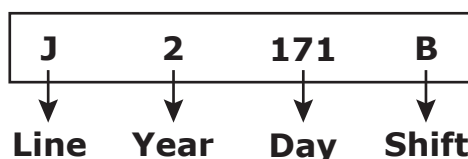

*The following is an explanation of how to determine the age of your "JIFFY" <sup>mix</sup> products.\**

All products will have a "Best If Used By" date that is based on a twelve month shelf life and printed on the top of each box in a format similar to that shown below:

Below the "Best If Used By" there is a line that contains one letter, followed by four numbers, ending with one letter. The first letter represents the production line used while manufacturing the mix. The first number is the year of production. The next three numbers represent the Julian day of the year. The last letter symbolizes the production shift.

**Example:** "J2171B" indicates that the product was produced on the "J" line on the 171st day of 2012, during the "B" (2nd) shift.

\*This explanation is for product produced ***after October 7th, 2012.***
